Kiyomizu consists of:

- BIO-MOS® (mannan oligosaccharides)
- organic trace elements
- astaxanthin
- easily digestible protein
- prebiotics and probiotics
- organically bonded vitamins and minerals
- special algae products - essential for the production of Omega 3
- Montmorillonite clay (bentonite)
- yeast extracts
- ingredients to improve digestion

Please note:

Do not feed the fish more than they eat in five minutes.

Remove any uneaten feed.

When the water temperature is less than 10°C, Koi have a reduced appetite and slow digestion and should be fed accordingly.

Do not feed Koi if the water temperature drops below 5°C
